

**SECRET****MEMORANDUM FOR: Deputy Director (Support)****SUBJECT****1. PAPS Review of Administrative Plan for  
SR Division Subsidy Project AEGUOR****I. Compliance with Plan**

1. An Administrative Plan for the field-controlled subject project was prepared by this Staff in September 1953. A review as of this date with SR Headquarters indicates that the Plan has been substantially complied with.

**II. Adequacy of Plan**

2. The Plan is adequate for present needs. However, the Logistics personnel assigned to SR Division have requested that a section be written into the Plan establishing procedures whereby equipment requisitioned from the Office of Logistics may be written off by that Office or, if appropriate, provide procedures for retaining control. While the Plan cannot be amended retroactively to cover equipment already transmitted, it will be amended to cover future transmittals upon advice from the Division that such action is contemplated, which is not presently the case.

3. If the Plan is ever amended for the above purpose or for any other reason, such amendment should also include recognition of the fact that the project is financially administered in the field, and the budget section should be revised to conform with present administrative standards.
